

SQL PROJECT

DATASET DESCRIPTION

The Cast and Crew dataset contains detailed information about movies, actors name, directors, and other crew members. The dataset is designed to support data analysis related to movie production patterns, actor and director collaborations, and film industry trends. It consists of multiple related tables that are connected using primary and foreign key relationships.

```
create database sqlproject;
```

```
use sqlproject;
```

```
select count(*) from cast;
```

```
select * from cast;
```

```
select * from crew;
```

1.find which movie is release more time.

```
select      movie_title,
```

```
count(*) as  more_count
```

```
from  cast  group  by
```

```
movie_title  order  by
```

```
more_count desc limit 1;
```

2.find total number of cast entries. select
count(*) as cast_total from cast;

3.find which actor has act more.

```
select    name as  
actor_name, count(*)  
as movies_count from  
cast group by name  
order by movies_count  
desc limit 1;
```

4.find the character name of "guy siner".

```
select  
    character_name as guysiner_character from  
cast  
where name = 'Guy Siner';
```

5.find character name,movie title,movie_release_date of "guy siner". select

```
    character_name as guysiner_character,  
movie_title,    movie_release_date from  
cast  
where name ='Guy Siner';
```

6.find the character names were cast order 0.

select

```
character_name as character_name,  
name as actor_name,  movie_title,  
movie_release_date,cast_order from  
cast where cast_order = 0;
```

7.find movie title that starts from 'A'.

```
select distinct  movie_title,  
movie_release_date  from  
cast where movie_title like  
'A%';
```

8.find total count of movie ariel.

```
select  movie_title,  count(*)  
as total_cast_entries from cast  
where movie_title = 'Ariel'  
group by movie_title;
```

select count(distinct job) as total_directors
from crew;

select * from crew;

12.show all the writers movies.
select job,movie_title
from crew where
job='Writer' order by
job,movie_title;

13.show the release date of movie 'ocean's thirteen'.
select movie_title, movie_release_date from crew where
movie_title = "Ocean's Thirteen";

14.show the last movie in the crew table.
select * from
crew

order by movie_release_date desc limit
1;

15.movies of 'gary kurtz'.

select movie_title,name from
crew
where name like '%Gary Kurtz%';

16.Total number of movies 'terry mckay' acted in.

select count(*) as total_movies from crew
where name = 'Terry McKay';

17.All crew members of the movie 'star wars'.

select name, job, department,movie_title from
crew
where movie_title ='Star Wars';

18.total number of movies released .

select count(*) as total_movies from
crew
where movie_release_date IS NOT NULL;

19.find name that starting with 'G'.

```
select distinct name  
from crew where  
name like 'G%';
```

20.who's movie is released more time.

```
select name,count(*) as total_movies  
from crew group by name order by  
total_movies desc limit 1;
```

21.Which actor acted in the most
movies.

```
select c.name as name,count(*) as  
total_movies  
from cast ct  
JOIN crew c on c.id = ct.id  
group by c.name  
order by total_movies desc  
limit 1;
```
